Mr. Honda with his friend Takeo Fujisawa aimed to build the company in one of the best companies World Motorcycle Manufacturers' Championship. At start the founding of company Mr. Honda made a bicycle engine and the first person trying to drive the bicycle was his wife. Year after year the company Honda makes new innovations for motorcycles, and Mr. Honda makes a motorcycle model with four-stroke engine and in 1958 his model Ã came to the United States and Honda was already the largest Japanese manufacturer of motorcycles. Once Honda Motor started production of motorcycles many foreign companies are interested in producing Honda. fast-growing , management improvements implemented at Honda Company Ã was truly revolutionary. Honda Company has four fundamental principles, which are the creation of new markets, the participation of all employees in management, the internationalization production, the solution of technical and other problems without looking back to previous, traditions and common points of view. For elegant solutions to complex engineering problems, Honda has always walked the easiest¹ way. Mr. Honda has always told his employees that they always make your products friendly, and it is implemented in his company. Honda has a philosophy that is providing joy to the world through new challenges and dream fulfillment. Ã ④¢ The inspiring spirit of Honda Honda R&D Center Ã is separated from the parent company in companies that operate independently. At the same time, Honda also begins a difficult way to become a member of an automotive industry. In May 1956 Honda brought together the engineering design division of the Saitama and Hamamatsu factories to establish the Head Office Design division at the Shirako plant. This action aims at The independence of the R&. Center in June 1957 was set up a R&D Center as a system identifiable separately from the headquarters and the headquarters. central. The Honda organization has continued to expand its business scope launching Honda Carburetor Research Co., Ltd., Ã ¨ for the research and development of fuel supply systems. Honda also has several major R&D bases abroad: Honda R&D Americas, Inc., Los Angeles Center (HRA-LA), Honda R&D Americas, Inc., Ohio Center (HRA-O), Honda R&D Europe (Deutschland), Honda R&D Europe (U.K.) Ltd., Honda R&D Southeast Asia (HRS) and Honda R&D Thailand (HRT). The Honda Company has a project called My Record Project that was implemented throughout the company in July 1960. This Ã project was conceived by Takeo Fujisawa, Senior Managing Director, who believes that recording the activities daily newspapers of people working at the company refletterÃ the growth of the company. This work-history notebook allows every employee to share the hope and passion invested in hard work. Not only are things written about happiness, but also sadness and frustration with his colleagues and supervisors. The notebook was kept on at work for anyone who wanted to read it at any time. The objective is to properly assess each individual's hard work and discover special skills that can be used in the future. Size of Honda worldwide. As an international company where its factories can be found in almost all countries, Honda started the company from a very small step. Founded initially in Japan in 1948, Honda began spreading its wings from country to country that now Honda's size around the world is really large. HondaÃÂ operations including its factories and the distributor of the products are located in 4 different regions of the world which are: Japan and Asia Oceania Australia, Bangladesh, Bhutan, Brunei, Cambodia, China, Fiji, Guam, Hong Kong, India, Indonesia, Japan, Korea, Laos, Malaysia, Mongolia, Nepal, New Caledonia, ,naigiabrezA ,naigiabrezA ,airtsuA ,ainemrA aporuE .manteiV e ,aidnaliahT ,nawiaT ,itihaT ,aknaL irS ,eropagniS ,napiaS ,enippiliF ,natsikaP ,adnaleZ Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Netherlands, Norway, Poland, Portugal, Romania, Russia, Serbia, Slovakia, Slovenia, Spain, Sweden Switzerland, United Kingdom, Ukraine. Africa and Middle East Angola, Bahrain, Benin, Burkina Faso, Ivory Coast Egypt, Ethiopia, Gabon, Ghana, Israel, Jordan, Kenya, Kuwait, Lebanon, Madagascar, Mauritius, Morocco, Mozambique, Nigeria, Oman, Qatar, Saudi Arabia, Senegal, Seychelles, Sierra Leone, South Africa, Tunisia, Turkey, U.A.E., Uganda, Yemen, Zambia, Zimbabwe. Americas Antigua, Argentina, Aruba, Bahamas, Barbados, Bermuda, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Curacao, Dominican Republic, Ecuador, El Salvador, Grand Cayman, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, St. Kitts, St. Lucia, St. Maarten Suriname, Trinidad, U.S.A., Uruguay, Venezuela. However, compared to other companies in other countries, Honda in 2012, in terms of car production, is still in sixth place globally. It is important to note that Honda’s expansion in many parts of the world is underpinned by a deep analysis of its people on the market in which it wants to invest, especially in terms of the local culture of the country itself. For example, the expansion of Â into Europe means that the company must understand the European culture that will determine the rate of taste and demand in that region. Basically, when it comes to understanding the culture of a country, there are so-called high context cultures versus low context ones. High context culture could mean that the messages they deliver to people depend on contextual signals covering gender, age, balance of power, am am etted onos non ehc esoc id attart is ,elorap ertla nI .icisif ittircs itset ad non e It works mainly on countries such as China, Japan, Italy, France, Spain and Latin American countries. A graph of countries' trends on low or high context culture, especially when it comes to flavor on commercials. On the other hand, a low-context culture emphasizes the distinctive written text or spoken words, in which ideas are explicitly communicated. It also means that this culture expects people to say what they really mean and do what they say. Examples of countries falling into this category are the United States, the Scandinavian nations and Germany. The following figure shows a graphical view of high context and low context countries. When it comes to advertising, high-context culture is more about implicit style where the emphasis is on feeling and general prospects rather than providing information as well. For example, Honda’s jazz website contained a lot of infromation that would be seen too much for high-context culture such as French and Italians. In addition, high context cultures have been much slower than low context cultures when it comes to adopting the Internet. Conversely, low context nations like Germany would most likely have been able to appreciate Honda’s jazz website. Since Europe is made up of both, it is essential to consider two separate market segments when planning your marketing strategy. Structure of the Honda as we know that the organizational structure will relate to the market strategy of a company. When a company decides to expand its market into the global market, it has to decide how it will interact with every market in that area. As one of the major applied area organizations of the multinational company, the Honda applied area structure (geographical) makes it easier for them to market their products according to the geographical and cultural aspects of each region. As stated by Honda in 1991, Honda also creates the Japan Environment Committee, which later expanded into other areas that are, North America, South South Europe, Asia and Oceania and China. From every local Honda branch, they asked to sell Honda's product as motorcycles of cars, which they considered the preferences of the most suitable vehicles¹ in that region. With this type of structure in fact Honda Ã was challenged to develop its own quality particular area so you can always bring something new to the customer at low cost. This Ã is one of the aspects that can make Honda left behind their competitors as they have focused more¹ on product development. When they introduce a new product to their market area, they have done well planned planning and research and development and they also think about sufficient time intervals for the latest product launches. The advantage of this structure compared to other organizational structures Ã¢ that this structure priority their local branches (regional branches) to explore and make them easier¹ to expand their market in that area. However, there are also disadvantages that you find between one and the other local branches will compete in terms of market and there is also an inefficient duplication of activities all local branches. The strategies do not globalize, localize: Honda is not controlled by the headquarters, instead, Honda produces its vehicles everywhere. It operates as an autonomous company in vehicle design and production based on consumer behavior and local conditions. In other words, all industrial companies maintain their research and development, design functions and other technical teams close to home in order to easily manage executives who are miles removed from local preferences and circumstances. Embrace Paradox: Honda as a knowledge-rich organization requires its workers at all levels who continually hit holes in the status quo. They do so at the meetings that have taken place which are known as "Waigaya". The meeting takes place when they have to find a better strategic or tactical choice. Honda has always perceived the paradox as a way to be critical and e .adnoH yb detnevni si gnireenigne dezinorhcnys sa nwonk noitavonni na yb yrotcaf elbixelf fo mret ehT .egnellahc eht etagivan yltfed ot elba gnieb rof serocs hgih denrae sah adnoH dna srerutcafunam lla rof maerd eht si yrotcaf elbmin dna tneiciffe sa eb oT .sruoh tsuj ni rehtona retfa eno sotua elpitlum ecudorp ylsselmaes adnoH ,shtnom gnikat yb elcihev wen a rof yrotcaf a looter ot deen seinapmoc rehto fI :ytilibixelf yrotcaf no sucoF .stluser retrauq ot retrauq yb ton dna erutluc etaroproc euqinu eht esrubsid yeht llew woh dna noitazinagro eht tuohguorht ytivitaerc laudividni etavitluc yeht llew woh yb nees si sseccus fo stnemerusaem ehT .retteb dna retsaf meht gnidliub rof seuqinhcet wen gnidnif dna elcihev fo sledom wen gningised ni seilppa noitavonni ssecorp dna tcudorp ni seil htgnerts adnoH fo OEC ehT .lles yeht taht stcudorp eht gnirutcafunam tuoba elttil wonk ot dnet seirtni lacigolonhcet ni Soec Neve ,tluser that in .sreenigne he at the oec lla ll lla sah 9491 by Gnidnuof Sâ€ã¢ Adnoh taht drug yranedrotxe he is the :Teas toh eht ni reenivne na tup .Evitcepsrep sâ€â€â€Tamnoh GniarhParap â€â€nO'tnegevor erbacni erbacni erbacni erbacni. As we know, it is not easy to grow a company like multinational and Honda can do it in a short time. It is expected that in the current budget â € at least 90% of the sales of cars â ™ Hondaã ¢ grow. Honda is a company that really sees the world as its market and thinks a lot about what it takes to be successful.
